Took bearing of object remembering from last week (referring to last report he made on Monday). Set directions W by N.W. object a bright orange with sharp clean edges.

Was 90 degrees above horizon at about 45 degrees from north moved in west by northwest direction. Coming closer to ground in appearance until it came to 5 degrees above the horizon. At this a left turn to the west traveled some distance then light went out like turning off a light switch. What "diameter". Just before it went out it was very small.
